Design Philosophy

Our design philosophy revolves around creativity and originality along with functionality and ease of use.

We believe that innovation expression and creativity are essential when developing a design but to acquire a truly refined and balanced space, attention to detail and a thorough understanding of medium are vital.

Our professional team strives to achieve “**Out of Box**” solutions by incorporating artistic knowledge and technical experience to ensure quality to living environment.

To attain high standards of construction, design ideas pass through several stages before finalizing and execution. These stages include:

Facade Uplifting and Interior Design Of **Ptcl Corporate Office Clifton Karachi**

Transformation of an old residential bungalow to a Corporate Business Office. Contemporary look to reflect modernistic approach of telecom giant was client's

After

Before

Design Challenge

When old walls were dismantled, large structural beams were visible which could not be removed. Some of them were as low as 7 feet from ground. To get clean clear spans for open plan office was the real challenge. Second constraint was budget.

Before
